

## Worksheet for HW 7 problem 2

In this problem, you will perform ‘Gaussian elimination’ by hand. Given the equation  $\mathbf{A} \cdot \mathbf{x} = \mathbf{b}$ , where

$$A = \begin{bmatrix} 2 & 1 & -1 & 0 \\ 1 & 1 & 2 & 0 \\ -1 & 2 & 1 & 1 \\ 6 & 1 & 1 & -2 \end{bmatrix}, \quad b = \begin{bmatrix} 1 \\ -1 \\ 0 \\ 2 \end{bmatrix},$$

carry out each step of the Gaussian elimination procedure by writing the intermediate ‘augmented’ matrices. There are a total of six steps in this process; each step ‘gets rid of’ one term from the matrix  $A$  while introducing other changes. Each step takes the form

$$\text{Let row } \_\_\_\_\_ = \text{row } \_\_\_\_\_ - \_\_\_\_\_ \times \text{row } \_\_\_\_\_$$

and is followed by an updated augmented matrix of the form

$$\left[ \begin{array}{cccc|c} A_{11} & A_{12} & A_{13} & A_{14} & b_1 \\ A_{21} & A_{22} & A_{23} & A_{24} & b_2 \\ A_{31} & A_{32} & A_{33} & A_{34} & b_3 \\ A_{41} & A_{42} & A_{43} & A_{44} & b_4 \end{array} \right],$$

where some entries will be zero. Do this problem in the template given below.

- Let row  $\_\_\_\_\_ = \text{row } \_\_\_\_\_ - \_\_\_\_\_ \times \text{row } \_\_\_\_\_.$

The new augmented matrix is now

$$\left[ \begin{array}{cccc|c} & & & & \\ & & & & \\ & & & & \\ & & & & \end{array} \right],$$

- Let row  $\_\_\_\_\_ = \text{row } \_\_\_\_\_ - \_\_\_\_\_ \times \text{row } \_\_\_\_\_.$

The new augmented matrix is now

$$\left[ \begin{array}{cccc|c} & & & & \\ & & & & \\ & & & & \\ & & & & \end{array} \right],$$

3. Let row \_\_\_\_\_ = row \_\_\_\_\_ - \_\_\_\_\_  $\times$  row \_\_\_\_\_

The new augmented matrix is now

$$\left[ \begin{array}{ccc|c} & & & \\ & & & \\ & & & \end{array} \right]$$

4. Let row \_\_\_\_\_ = row \_\_\_\_\_ - \_\_\_\_\_  $\times$  row \_\_\_\_\_

The new augmented matrix is now

$$\left[ \begin{array}{ccc|c} & & & \\ & & & \\ & & & \end{array} \right]$$

5. Let row \_\_\_\_\_ = row \_\_\_\_\_ - \_\_\_\_\_  $\times$  row \_\_\_\_\_

The new augmented matrix is now

$$\left[ \begin{array}{ccc|c} & & & \\ & & & \\ & & & \end{array} \right]$$

6. Let row \_\_\_\_\_ = row \_\_\_\_\_ - \_\_\_\_\_  $\times$  row \_\_\_\_\_

The new augmented matrix is now

$$\left[ \begin{array}{ccc|c} & & & \\ & & & \\ & & & \end{array} \right]$$
